CS472 Foundations of Artificial Intelligence Final Exam Solutions. December 19, 2003 Search (and a bit o' machine learning) 1. A* becomes best-first search when $f(n) = h(n)$, i.e. when $g(n)$ is assumed to be 0. 2. BFS is a uniform-cost search with all step costs equal to 1 (or some positive constant). 3. A* is optimal when $h(n)$ is admissible for all nodes n . f must also be monotonically increasing along any path to the goal, which is easy to ensure as long as we disallow negative path costs.

CS472 Foundations of Artificial Intelligence

There are 48 pages in this final examination, including this one. In addition, tear-off sheets are provided at the end with duplicate drawings and data. As always, open book, open notes, open just about everything. 1 ; Quiz 1, Problem 1, Rule Systems (50 points)
