STRUCTURAL REPAIR DOCUMENTS & MANUALS

Hi people, My first question on this forum. I know/understand the actual requirement on the SRMs that if any damage goes beyond the limitations, the manufacturer requires to be consulted and the repair (if it applies) needs FAA approval, however I am trying to find on the FARs (43, 25, 121) or other regulations the actual statement that would say that.

Repairs beyond SRM - Aircraft engineering - Eng-Tips

The repair of aircraft components is slightly different from a complete overhaul, as the workshop needs only to determine what causes a given defect, rectify that defect, run some bench tests and release the component back to service. The trouble shooting procedures are generally available in the CMM or the CRM (component repair manual).

Aircraft Component Maintenance - Main Issues ...

On-wing (line) - Airbus AMM is the document to use, which contains inspection criteria, allowable damage limits & basic on-wing repairs just there to prevent AOGs & ensure T/R is serviceable. On-wing (base) - If possible use Goodrich SRM, which contains more extensive T/R structural on-wing repairs.
