## **Applying The Fuzzy Analytical Hierarchy Process**

The Analytical Hierarchy Process (AHP) enables a hierarchical granulation [20]. It represents the hierarchical organization of given information. To address imprecision and uncertainty, fuzzy logic is added to conventional AHP. Then, FAHP makes it possible to work with

process (AHP) is one of the most widely-used multiattribute decision-making methods. In this section we overview the fuzzy AHP methods existing in the literature. We present the four different approaches of fuzzy AHP methods by giving numerical examples.

## **Fuzzy Analytic Hierarchy Process and its Application**

## Download Ebook Applying The

The analytic hierarchy process (AHP) has been widely applied in the last four decades, and a fuzzy logic version, the fuzzy AHP (FAHP), has also been employed in many studies since its formulation. However, it is not clear whether the FAHP is better than the AHP in terms of quality of the solution.
