Best Cheap Telescopes 2020 - Reviews & Buyer's Guide

The Celestron NexStar 90SLT is an excellent entry-level telescope for those new to astronomy and on a budget. The telescope is a combination of both reflector and refractor technology (known as compound), with well-made optics. It excels at viewing the Sun, Moon, and other planets. Saturn is about the limit of its magnification, which will appear small, but you'll still be able to make out the rings and some of its moons.
