## **www.wonder-woman.info**

Behavioral biology is the science of trying to figure this out, with the guiding assumption that an understanding of who and why we are cannot be achieved without considering our biology.

## **Biology and Human Behavior: The Neurological Origins of**

...

A behavior occurs—whether an example of humans at our best, worst, or somewhere in between. What went on in a person's brain a second before the behavior happened? Then Sapolsky pulls out to a slightly larger field of vision, a little earlier in time: What sight, sound, or smell caused the nervous system to produce that behavior?
