Abstract. Classroom tests provide teachers with essential information used to make decisions about instruction and student grades. A table of specification (TOS) can be used to help teachers frame the decision making process of test construction and improve the validity of teacher's evaluations based on tests constructed for classroom use. In this article we explain the purpose of a TOS and how to use it to help construct classroom tests.

...

The second important step in the test construction is to prepare the test specifications. In order to be sure that the test will measure a representative sample of the instructional objectives and content areas we must prepare test specifications. So that an elaborate design is necessary for test construction.
