[PDF] Clinical Data Interpretation For Medical Finals ...

Clinical data is essentially the safety and performance information that is generated from the use of a medical device. To demonstrate safety and performance of a medical device, clinical evidence must be provided. Basically, there are two possibilities to generate clinical evidence. Firstly, clinical data may be collected through clinical investigations conducted with the respective medical device.

Clinical Targets for CGM Data Interpretation

Typically, we rely on screening and diagnostic tests that are available in medical facilities to provide us information regarding the disease status of our patients. However, it is important to assess the quality of these tests in order to make reasonable decisions regarding their interpretation and use in clinical decision-making . In evaluating the quality of diagnostic and screening tests, it is important to consider the validity (i.e. sensitivity and specificity)
