But to monitor SAP HANA standalone databases you need a template on technical

system level to see a valid value in the System Monitoring system list and to access the hierarchy for the HANA system. Perform the following steps to create a template for you SAP HANA system and turn the monitoring status green for HANA Technical System.

System Monitoring - SAP

If you select a technical

system in step 5, a corresponding entry point will be created for this technical system, and System Monitoring will be activated for all associated managed objects (including technical instances, database and hosts). This allows you to remove monitoring for the whole entry point in one go, if required.
