CHAPTER 20

From Wikipedia, the free encyclopedia. Jump to navigation Jump to search. Operation Stella Polaris was the cover name for an operation in which Finnish signals intelligence records, equipment and personnel were transported into Sweden in late September 1944 after the end of combat on the Finnish-Soviet front in the Second World War. The purpose was to enable the signals intelligence activities to continue in Sweden and to prevent the equipment falling into the hands of the Soviet Union.

Operation Stella Polaris - Wikipedia

Signals intelligence (SIGINT) is intelligence-gathering by interception of signals, whether communications between people (communications intelligence—abbreviated to COMINT) or from electronic signals not directly used in communication (electronic intelligence—abbreviated to ELINT).Signals intelligence is a subset of intelligence collection management.
