### Human Computer Interaction Hci Multiple

Human-Computer Interaction is multi-disciplinary area that focuses on building and studying interactive technology. We build on knowledge and techniques from social sciences to understand human cognition, perception and behavior. We build on knowledge and tools from computer science to design and implement novel systems.

### Human-Computer Interaction at Harvard SEAS

Human-computer interaction (HCI) studies the design and use of computer technology, focused on the interfaces between people (users) and computers. Researchers in the field of HCI observe the ways in which humans interact with computers and design technologies that let humans interact with computers in novel ways.

### Human-computer interaction - Wikipedia

The Master of Science in Human-Computer Interaction (HCI) prepares students to ideate, design, implement, and evaluate computer-based technologies so they are useful and usable for end users. This interdisciplinary degree integrates concepts and methods from computer science, graphic design and the social sciences.

Principles for human-AI interaction have been discussed in the human-computer interaction community for over two decades, but more study and innovation are needed in light of advances in AI and the growing uses of AI technologies in human-facing appli-cations. We propose 18 generally applicable design guide-lines for human-AI interaction.
