4d56 timing belt

the pulley puller I have is a piece of crap so I had to fabricate one from scratch. tomorrow morning I am going to re-install everything and hope for the best. The book calls for 4-5mm of deflection on the belt. my timing belt had about 1.5 inches it was so worn out and stretched, so that means my timing was retarded quite a bit.

A clever technique I saw for changing timing belts was to cut along the belt, to drop off the front 1/2 to 2/3, using the remaining section to keep all the cogs in place while fitting the new belt. Once the new one is on the cogs, chop off the remaining old belt and slide the new one on the rest of the way.
