2 <sup>™</sup> Activities for AP\* Biology POGIL 3. There are three regulatory checkpoints built into the cell cycle. a. Name the three checkpoints as shown on Model 1. b. Indicate the phase of the cell cycle, and what part of the phase (early or later), where each checkpoint occurs. 4.

### Cell Cycle Regulation - Lakewood High School

The cell cycle is an ordered series of events involving cell growth and cell division that produces two new daughter cells. Cells on the path to cell division proceed through a series of precisely timed and carefully regulated stages of growth, DNA replication, and division that produces two identical (clone) cells.
