As you get older, blood vessels that supply blood to your penis begin to close up and decay. With the use of Acoustic Wave Therapy, gently pulsating waves promote increased blood flow to the penis by opening existing blood vessels and stimulating the growth of new blood vessels. The improvement in blood flow results in stronger, harder, and ...

**Pricking the vessels : bloodletting therapy in Chinese ...**

Angiograms help us to visualize blood vessels by X-ray. To perform an angiogram, we use a local anesthesia in the upper part of your thigh. Then we insert a catheter into your body through a blood vessel in that area. We administer intravenous sedation to keep you comfortable and make sure you do not move while we take the X-rays.
