The skin acts as a tough exterior barrier  
of protection; it is essentially the body's  
first line of defense. It also serves as a  
host to numerous microorgan- isms and  
is reactive to innumerable external  
stimuli, including stress.

Many different types of bacteria can cause this infection. A very severe and usually deadly form of necrotizing soft tissue infection is due to the bacteria *Streptococcus pyogenes*, which is sometimes called "flesh-eating bacteria" or strep.. Necrotizing soft tissue infection develops when the bacteria enters the body, usually through a minor cut or scrape.
