Getting Started with Rails — Ruby on Rails Guides
In Ruby 2.0-2.6, Ruby would split a hash with both symbol keys and non-symbol keys into two hashes, one symbol keyed hash used for keyword arguments, and one non-symbol keyed hash to be passed as a positional argument. The need for this splitting appears to be rare. I have heard the splitting was not matz's intended behavior originally.

Feature #16891: Restore Positional Argument to ... - Ruby
