SNAP-ON 1992-2014

Snap packages have the potential to replace ways we install and use software on Linux, by making it easier to distribute. Instead of software developers having to create several different packages, binaries and delivery methods to accomplish the same task, they'll just create a single snap container.

How To Use And Install Snap Packages On Linux

The SNAP architecture is ideal for Earth Observation processing and analysis due to the following technological innovations: Extensibility, Portability, Modular Rich Client Platform, Generic EO Data Abstraction, Tiled Memory Management, and a Graph Processing
