most concise, method for describing inequalities and solutions to inequalities is called interval notation. With this convention, sets are built with parentheses or brackets, each having a distinct meaning. The solutions to $x \geq 4$ are represented as $[4, \infty)$.

Intermediate Algebra

In this unit, we learn how to solve linear equations and inequalities that contain a single variable. For example, we'll solve equations like $2(x+3)=(4x-1)/2+7$ and inequalities like $5x-2 \geq 2(x-1)$.
