A database administrator can grant privileges on database objects to a role and have the privileges automatically applied to all users assigned to that role. When a user's function within an organization changes, changing the user's role is far easier than deleting old privileges and granting new privileges to go along with the new function.

Roles - Teradata Database

Welcome to the second in the series of courses designed to provide you with an introduction to the Teradata Database. The first course, Database Basics, served as a refresher, or provided a foundation, to those who are new to the world of Databases. This course, Teradata Fundamentals builds on that foundation and transitions to exploring the Teradata Database.
