The ladder of inference has been an incredible tool to help Warren walk students through their thinking, modeling the tool step by step, climbing up or down the ladder as students offer insights from the text. “It was such a simple and elegant way to allow someone who couldn’t wrap their head around inferring to do it well,” Warren said.

brainstorming tools,  
dynamic thinking tools,  
structural thinking  
tools, and computer  
based tools. Although  
each tool is designed  
to stand alone, they  
also build on one  
another and can be  
used in combination to  
achieve deeper  
insights into dynamic  
behavior.

Here's a definition from  
Barry Richmond, who  
coined the term in  
1987: 1 Systems

Thinking is the art and  
science of making  
reliable inferences  
about behavior by  
developing an  
increasingly deep  
understanding of  
underlying structure..  
Cultivating this "art  
and science" leads to  
routine use of correct  
mental models that see  
the world as a complex
