General Power - Diesel Generator Sales, Transfer Switches ...

An automatic transfer switch or a transfer panel is a device that senses and automatically switches between power sources. An automatic transfer switch automatically starts the generator when the power goes out or becomes unstable and then switches back to main utility when utility power is restored and normal conditions are met.

Himoinsa Generator Control Panel | General Power

Hipower is proud to bring you the CMD 2.0 Control Panel. This device integrates the possibility of starting the motor in a manual or automatic way (by free voltage contact), and protecting it from possible breakdowns during operation.

HIMOINSA CMD 2.0 Control Panel

To accomplish this we had to pull the meter and used the circuit breaker box for the house for a raceway to the new transfer switch box. Then feed the circuit breaker box from there. If the main circuit breaker box is already too crowded this might not be possible. 2/0 welding cable was used to accoumplish this because it is more flexible.
