A: Observing vaccinated children for many years to look for long-term health conditions would not be practical, and withholding an effective vaccine from children while long-term studies are being done wouldn't be ethical. A more practical approach is to look at health conditions themselves and at the factors that cause them. Scientists are already working to identify risk factors that can ...

Potential options include: Get vaccinated in secret (if your local laws allow it). Run the risk of your family finding out. Try asking for your family to let you be vaccinated. You may be able to convince them. Try asking your doctor, your school nurse, or another responsible adult to help convince your family.
